

ASSOCIATE

at K2 Dental Arts

Company

K2 Dental Arts is a rapidly growing startup dental laboratory founded by three Darden MBAs. By focusing on the latest technology in the field of dental restorations, K2 has become one of the fastest growing and premier dental laboratories in the Mid-Atlantic over the past three years and is now expanding across the United States and Canada. K2 uses the most cutting-edge custom manufacturing methods; crowns are digitally designed, milled and then quality controlled on 3D printed models.

Position – Charlottesville, Full Time

Join our team to enhance your education and accelerate your career. As a Client Relations Specialist (CRS), you will be a part of our close-knit team in the quickly developing world of digital dentistry. K2 provides you with all the necessary training to be confident and prepared to help dentists throughout the United States deliver the highest level of patient care. You will be a part of our supportive work culture and fast-paced work environment.

Work you will do

As a CRS, you will be given great responsibility from day one as you will oversee the accuracy and timeliness of dental work for hundreds of patients throughout the US. You will form relationships with dentists and facilitate the entire ordering process for their dental restorations. Continuing clinical education in the field of dental restorations enables you to evaluate all of the dentists' dental work, maintain K2's proprietary database of cases, and provide clinical as well as technological advice. You will spend your time between evaluating 3D digital scans, logistics support through phone and email as well as a number of other fields. In fact, you will be a generalist; rather than spend your day entirely in one aspect of the company, you will be challenged to spend part of the day in multiple areas.

K2 is constantly growing and opportunities to gain exposure to different areas of work arise on a regular basis. For example, current Client Relations Specialists have branched out into the HR, Marketing, Accounting, Billing, and Doctor-training fields as the company's needs have grown.

How you'll grow

You will develop your professional interpersonal skills by communicating with and solving the problems of our 200+ dentists on a daily basis. You will build effective prioritization, organizational, and teamwork skills by managing office workflow and collaborating with our sales representatives in the field and our manufacturing facility in California. In addition, you will develop a valuable niche

knowledgebase in the dental field, proving that you can effectively operate in highly technical and interpersonal environment. Finally, you will see the dental industry from a unique perspective; by gaining exposure to cutting-edge digital workflow as well as exposure to a very wide range of dentists, their priorities, and style. K2 is small but successful and every team member has a major impact on the company. In short, you will be doing irreplaceable work with a close-knit and highly qualified bunch that are excited about the future of the company and industry.

Qualifications:

- Exceptional communication skill
- Proven ability to reach goals
- Organize
- Ability to work in fast-paced environment
- Quick to learn
- Team experience
